

Chapter III FIRE DEPARTMENT VEHICLES

Subject 6 CAD Equipment File

Policy

A. The CAD equipment file is a list of all apparatus with any special qualifications or equipment carried. This file is used to determine which company will be recommended for a response to a specific incident.

B. Any company that carries any of the following equipment must report any status change to dispatch so the CAD equipment file can be updated. This file must be kept accurate at all times.

1. AED
2. Backboard
3. Thermal Imaging Camera
4. Hydraulic Rescue Tools
5. Equipment affecting ALS capability
6. CO/atmosphere monitoring meters

C. In addition to notifying Fire Dispatch, the company's District Chief will also need notification when any specialized equipment goes in or out of service.
